

## **Lions Australia MD201 Oz Clubhouse** **Instructions Addendum 3**

### **Getting Google to find your site**

Logged on and in the edit mode you will see a menu editor top right hand side called 'OPEN'

Click on this and enter some data as I did below:

Below is what I have added to my Club site for Google to find it, you may want to add some code to each page and also add a different title to each page. E.g Lions Club of Cessnock – Home etc.

In my Strathfieldsaye Club site I have the following:

**Title:** Lions Club of Strathfieldsaye – Home

**Keywords:** Lions Clubs, Strathfieldsaye, Bendigo, Victoria, Australia, Community Service

**Description:** The City of Greater Bendigo is home to five Lions and one Lioness Club. Population is around 100,000 people. Our club has served the Bendigo Community since 1976. The Club meets on the 2nd Monday at 7.30pm for Business at the Lions Hall, Eppalock Road. Also the Club meets 4th Monday at 7.30pm for Dinner at various locations around Bendigo..

**Header Code:** None

With the Strathfieldsaye site and Google has easily found it with the info I listed above, and without the Header Code. I put the same info on each page.

**If I search google for 'Strathfieldsaye Lions' I get the following Results:**

1. **[Lions Club of Strathfieldsaye - Home](#)**
